

# CAP-OFF

## Operation Instruction

1. Always wear protective gloves.
2. Using your right or left hand move the **Cap-Off Tool** over the top of your selected battery cap.
3. Identify the grip points on the top of the battery cap and rotate the **Cap-Off Tool** to line up using the four bumped out areas of tools socket and place it on the battery cap.
4. Press straight down on the **Cap-Off Tool** until it reaches the base of the battery cap.
5. Turn the **Cap-Off Tool** counter clockwise a  $\frac{1}{4}$  turn.
6. Lift the **Cap-Off Tool** straight up noting that the battery cap stays firmly in the **Cap-Off** socket.
7. Inspect the water level in the battery cell, add water as required without over filling.
8. With the battery cap firmly fixed to the **Cap-Off** socket insert the battery cap into the filling port of the battery cell.
9. Turn the **Cap-Off Tool** clockwise a  $\frac{1}{4}$  turn.
10. Pull the **Cap-Off Tool** straight up to remove it from the battery cap.
11. Repeat the steps above for each battery cell.
